

ANGELA VANIA SUGIYONO

- | angelasugiyono95@gmail.com | [linkedin.com/in/angelavs](https://www.linkedin.com/in/angelavs) | <https://github.com/shzirley>
Surabaya, East Java

Technology enthusiast with a strong foundation in research and innovation. I specialize in applying AI and Machine Learning to create impactful data-driven solutions. With a keen interest in systems architecture and computer networks, I am passionate about bridging theory and practice to design scalable, efficient, and secure technologies.

Work Experiences

Sepuluh Nopember Institute of Technology (ITS) - Surabaya <i>Operating Systems Teaching Assistant</i> - Guided technical lab sessions on OS fundamentals: Linux, Concurrency (IPC), Booting sequences, and FUSE. - Conducted technical code reviews in C/C++, mentoring students on low-level memory management and debugging. - Mentored over 80 students in lab sessions and curated rigorous FUSE practical modules to challenge students' understanding of filesystem implementation.	Mar 2026 - Present
ITS Nabu - Surabaya <i>Frontend Developer</i> - Developed and maintained frontend features for user monitoring and cybersecurity-related activities. - Supported the development of platforms and initiatives for cybersecurity seminars, events, and community engagement.	Aug 2026 - Present
Sepuluh Nopember Institute of Technology (ITS) <i>Computer Network Teaching Assistant</i> - Guided 90+ students through hands-on labs on GNS3, subnetting, routing, DNS, DHCP, firewalls, and network troubleshooting. - Evaluated practical assignments and assessed students' network configurations and understanding of core networking concepts.	Sep 2026 - Present

Education Level

Institut Teknologi Sepuluh Nopember - Surabaya, Indonesia <i>Bachelor of Informatics Engineering, 3.29/4.00</i>	Aug 2024
2 States Senior High School Surakarta - Surakarta, Indonesia <i>Senior High School, Natural Sciences, 91.42/100.00</i>	Jul 2021 - Jul 2024

Organisational Experience

Himpunan Mahasiswa Teknik Computer Informatika ITS - Surabaya <i>Staff Research and Technology</i> Part of a specialized bureau focused on enhancing the academic and competitive environment within the Informatics department through scientific programs, research development, and technical community management - Served as the Project-in-Charge (PIC) for the Elite TC Community, leading a team of 15 mentors and 5 volunteers to cultivate a high-performance competitive environment. - Served as the Project Lead for a departmental seminar titled "Static and Dynamic Malware Analysis with Real Malware Samples from HoneyPot" - Designed the Bluecamp Scientific Curriculum, providing comprehensive research and competition training for over 80 freshman students.	Mar 2026 - Present
SCHEMATICS - Surabaya, Indonesia <i>Expert Staff Data Management</i> A big annual event to promote the Department of Informatics and support high school students interested in technology through competitions and developmental activities. - Implemented automated administration and registration systems for large-scale technology competitions, successfully streamlining the processing of over 800+ participants. - Coordinated cross-divisional data logistics to ensure seamless event execution and maintain high-quality participant support throughout the competition lifecycle.	Mar 2025 - Present
Youth Green Hackathon - Boyolali, Indonesia <i>General Secretary of Administration</i> Youth-led sustainability program raising awareness on green industry and environmental issues, successfully reaching people through campaigns, engaging 475 webinar participants, incubating 5 innovative ideas, and executing 90% carbon offset & reforestation efforts. Participated in the implementation of a youth-focused project promoting green industry opportunities in Boyolali, Central Java, with a climate innovation grant of approximately USD 12,000 from ChildFund International in Indonesia. Held the roles of Secretary, overseeing administrative responsibilities throughout the project.	Apr 2025 - Jun 2025

- Organized and maintained all project documentation, including meeting minutes, official correspondence, and progress reports.

SOLITS - Surakarta

Nov 2024 - Feb 2025

Staff Material & Method

Led efforts to promote Institut Teknologi Sepuluh Nopember (ITS) in the Surakarta Residency, introducing the institution and its educational offerings to local communities and high school students

- Delivered educational content through direct, face-to-face sessions, utilizing a communicative and interactive approach.
- Provided training and guidance to internal team members, fostering their ability to independently and consistently present educational materials.

Forum Anak Karanganyar - Karanganyar, Indonesia

Aug 2022 - Aug 2024

Institutional Division

An organization under the government that serves as a bridge for communication between the government and children in the fulfillment of children's rights. It also provides a platform for children to express their aspirations, needs, and the issues they face.

- Responsible for providing educational materials and resources on children's rights to raise awareness and promote child protection.

KIRSMADA - Surakarta, Indonesia

Jan 2022 - Dec 2023

Vice Chair

An extracurricular activity in the field of science that aims to help its members develop problem-solving and adaptability skills to tackle issues around them.

- Responsible as a facilitator of creative ideas to develop the potential of members, creating a structure for scientific activities, and setting targets to be achieved during the term of office.

Rumah Teknologi - Surakarta, Indonesia

Nov 2022 - Jan 2023

Member

A youth community collaborating with the Surakarta government to accelerate the Society 5.0 era and create a generation of young individuals who are excellent and wise in applying technology in daily life.

- Developed an Android application project using Kodular. The project is named Green Saldo, and its purpose is to address waste management issues in the surrounding environment. This application collaborates with SMEs to manage waste into valuable and marketable products.

Skills, Achievements & Other Experience

- Achievements** (2026): Finalist – BRIN AIDeaNation
- Achievements** (2026): Semifinalist – Datathon RISTEK UI
- Achievements** (2026): Top 8 National Finalist – Hult Prize Indonesia
- Achievements** (2026): Top 10 National Finalist – Dinus App Competition 11.0
- Achievements** (2025): Top 50 National Finalist – Digihack Digistar Club Telkom
- Achievements** (2023): Finalist – Scientific Festival, Universitas Tidar
- Achievements** (2023): 3rd Place Winner – National Scientific Essay Competition, Sebelas Maret University
- Achievements** (2023): Top 5 Finalist – National Essay Competition (LEN), Universitas Negeri Surabaya
- Projects** (2026): CLARITAS: An AI-driven health-tech platform that assists medical professionals in screening Alzheimer's risk through linguistic analysis, where I led as Chief Operating Officer (COO) focusing on implementation, execution of internal product development, and external strategies, and successfully secured funding of IDR 17,500,000 from ITS Youth Technopreneur
- Projects** (2023): Tailor App Community (TAPPCOM) is an Android application designed to support local tailoring MSMEs in reaching a wider market and building their brand to remain relevant and competitive in the digital era. This application aims to improve the economic conditions of local tailors and foster a digital society.
- Projects** (2023): Green Saldo: An application focused on waste management through recycling and reuse, aimed at controlling the growing amount of waste. The application also encourages collaboration among various stakeholders to collectively reduce the waste generated.
- Soft Skills**: Analytical Thinking, Critical Thinking, Problem Solving, Research, Project Management, Leadership, Public Speaking, Strategic Planning, Mentorship, and Collaborative Teamwork.
- Hard Skills**: C, C++, Python, Figma, SQL (MySQL), PHP, HTML/CSS, Linux, Operating Systems, Computer Networks, Database Design (CDM/PDM), GitHub, Railway
- Interest**: I developed a strong interest in machine learning, data, and artificial intelligence through active participation in hackathons, while also growing curious about operating systems and computer networks as I explore how low-level systems support intelligent and scalable technologies.
